

City and County of San Francisco

Office of the Controller – City Services Auditor

ANNUAL YEAR-END PERFORMANCE MEASURE REPORT

Fiscal Year 2008-09

October 29, 2009

**CONTROLLER'S OFFICE
CITY SERVICES AUDITOR**

The City Services Auditor was created within the Controller's Office through an amendment to the City Charter that was approved by voters in November 2003. Under Appendix F to the City Charter, the City Services Auditor has broad authority for:

- Reporting on the level and effectiveness of San Francisco's public services and benchmarking the city to other public agencies and jurisdictions.
- Conducting financial and performance audits of city departments, contractors, and functions to assess efficiency and effectiveness of processes and services.
- Operating a whistleblower hotline and website and investigating reports of waste, fraud, and abuse of city resources.
- Ensuring the financial integrity and improving the overall performance and efficiency of city government.

Project Team: Peg Stevenson, Director
Andrew Murray, Deputy Director
Keith DeMartini, Performance Analyst
Sherman Luk, Performance Analyst
Richard Kurylo, Operations Analyst

Citywide Performance Measurement Program

Program Overview

Performance measurement is the regular measurement and analysis of the results, outcomes, and efficiency of services or programs. Performance measurement is a best practice recognized by public administration and finance professionals. The Controller's Office implements the Citywide Performance Measurement Program, which collects, validates, and reports performance data from all of the City's 50+ departments. It also provides technical assistance and training to departments to help them improve their performance measurement.

San Francisco recently received the International City/County Management Association (ICMA) Certificate of Distinction for excellence in performance measurement which recognizes local governments for their exceptional commitment to continuous learning and improvement in performance measurement.

The Controller's Office began working with all City departments to collect performance data in 2000. In November 2003, San Francisco voters passed Proposition C establishing the City Services Auditor (CSA) in the Controller's Office. City Charter Appendix F, Section 101, mandates that CSA monitor the level and effectiveness of services provided by the City and County of San Francisco. Specifically, CSA must assess measures of effectiveness including the quality of service provided, citizen perceptions of quality, and the extent a service meets the needs for which it was created.

The general goal of the Controller's Office's performance measurement effort is to create an easy-to-use resource to help the City and its residents gain new insights and track over time what the City is doing well, and where it needs to improve, to result in more efficient, effective and thoughtful operations and allocation of resources.

The Citywide Performance Measurement Program within CSA maintains the performance measurement database, called the Citywide Performance Measurement System ("PM System"). The database contains over 1,100 measures for the City's departments. Departments are responsible for updating the data in the PM System at least every six months. 187 department users currently have

access to the PM System.

Measures are used for multiple purposes such as department management, reporting for the annual budget process (including publication of select measures in the Mayor's Proposed Budget), SFStat, and hearings for the Board of Supervisors.

Performance Measure Summary

The Performance Measure Report (see Appendix B) lists all current performance measures for all City departments. The report contains actual values for FY 2006-07 through FY 2008-09 and target values for FY 2008-09 and FY 2009-10, sorted by department, program, and goal.

Note that data is not available (“n/a”) for some measures where:

- Data comes from an external source and was not available in time for the report;
- Data is collected less often than annually;
- Measures are new and data has not yet been collected;
- Measures are old and are awaiting deletion; or
- The department simply did not complete their data entry in time for this report.

Many different types of performance measures are reported in the PM System by each department, including output, efficiency, and outcome measures. Department performance measures are also categorized into major service areas.

System and Process

The Citywide Performance Measurement Program collected performance measures in an Access database until 2007, when it was upgraded to the Cognos platform and integrated with the new budget preparation system into the Budget and Performance Measurement System (BPMS). It is the first step toward full integration between budget planning and performance measurement.

For each department, the database includes detailed information on programs, goals, measures, measure definitions, data sources, data collection methodologies, and other explanatory detail. Many of the measures tracked include more than 5 years of historical data.

Departments enter data into the PM System twice per year; in February to report updated current year data and targets

for the budget year, and in September to report final year end data.

The Controller's Office provides training for PM System users before each semi-annual data collection cycle. The training program focuses on what data is required, how to use the system, and evolving thinking on how to develop good performance measures, such as having an appropriate mix of efficiency and outcome measures, reliability, alignment with organizational mission and objectives, and usefulness to managers and policymakers.

FY 2009-10 Goals

In FY 2009-10, the Citywide Performance Measurement Program will focus on the following key initiatives:

- Improve the quality of the content in the PM System, such as helping departments create new performance measures, specifically benchmarks, customer satisfaction, and efficiency measures;
- Improve public reporting of performance data through updating our website, new public datasets, and more regular public reports;
- Develop performance dashboard reports; and
- Work with departments, such as the Human Services Agency and Public Utilities Commission, on specific performance measurement initiatives.

Contact Information

To learn about the Citywide Performance Measurement Program, please visit our website at www.sfgov.org/controller/performance. Features of the website include:

- Information about performance measurement;
- Various reports and datasets that include performance measurement information;
- Related performance measurement activities in San Francisco;
- Links to resource organizations and publications; and
- Contact information for the performance measurement team.

For employees of the City and County of San Francisco, resource materials are available for creating and improving performance measures within a department. Please visit the budget intranet site at <http://budget.sfgov.org/> and click on the Training Resources link.

For general information, please contact a member of the Citywide Performance Measurement Program at performance.con@sfgov.org or 415-554-5391.
